

# Dispense Drugs Faster with Rapid Sterility

## Advantages of Releasing Drugs from Quarantine Earlier

- Decrease costly drug waste
- Decrease internal drug shortages
- Improve space utilization
- Gain efficiencies by increasing batch size
- Detect contamination events faster

## ARL's Rapid Sterility Method

- Fully validated per USP <1223>

VALIDATION PARAMETER			
Specificity	✓	Repeatability	✓
Limit of Detection	✓	Recovery of Stressed & Injured Microorganisms	✓
Robustness	✓	Equivalency	✓
Ruggedness	✓		

- Tests all sample types including solutions, oil, and suspensions
- Non-Destructive allowing for identification of contaminating organisms
- Objective, automated results generated by the instrument
- Formulation specific method suitability required

ARL Bio Pharma is a contract laboratory that provides analytical and microbiology testing services. Our laboratory's regulatory expertise and comprehensive services supports your commitment to provide high-quality medications and excellent patient care.
