

Rapid Sterility Testing

Release drug products 60% faster

Confidently Answer the Question “Is my product sterile?” in only 6 days

The Method

**99% the same
as a USP <71> sterility test**

The main difference is using an automated instrument to detect ATP from microorganisms.

ARL performs method suitability to ensure the rapid method is appropriate for your drug substances and products.

The Validation

**Validated alternative sterility
test method per USP <1223>**

FDA recognizes validations that demonstrate non-inferiority to USP <71> Sterility Tests.

A Method You Can Trust:

- Simple, fast results
- Tests <71> required volumes
- Tests all drug products including oils and suspensions

The Advantage

**Effective and Reliable
for 503A and 503B Facilities**

Rapid test provides objective results in as little as 6 days.

Benefits:

- Leads to faster release times
- Reduces inventory storage
- Allows for microbial ID to support OOS investigations

Rapid Sterility - \$250 per test • Antimicrobials - \$350 per test
