

Validated Analytical Potency Methods

ARL has completed validating potency methods for the drugs listed below. The validation protocols and criteria are based on requirements in USP <1225> as well as FDA and ICH guidelines. Potency testing using these methods is provided at no additional cost and allows us to remove the non-validated disclaimer from the CoA. These validated methods use the HPLC instrument to test for potency and are designated on the CoA as AMIF. Click on the links below for the method validation summary documents that you may save for your records.

5-Hydroxytryptophan	\$160
7-Keto DHEA	\$160
Alprostadil	\$160 (concentrations \geq 5 mcg/mL)
Alprostadil in a mixture	\$160 (concentrations \geq 5 mcg/mL)
Amlodipine Besylate	\$160
Anastrozole	\$160
Atropine Sulfate Monohydrate	\$160
Baclofen	\$110
Benzyl Alcohol	\$160
Benzyl Benzoate	\$160
Bupivacaine HCl	\$160
DHEA	\$160
Diphenhydramine HCl	\$160
Estradiol	\$110
Estriol	\$110
Estrone	\$110
Fentanyl Citrate	\$160
Hydroxyprogesterone Caproate	\$160
Labetalol HCl	\$160
Levothyroxine (trituration)	\$160
Levothyroxine (tablets / capsules)	\$160
Lidocaine HCl	\$160
Liothyronine (trituration)	\$160 (trituration \geq 5 mcg)
Liothyronine (tablets / capsules)	\$160 (tablets / capsules \geq 5 mcg)
Medroxyprogesterone Acetate	\$160
Methylprednisolone Acetate	\$160
Metronidazole Benzoate	\$160
Nandrolone Decanoate	\$160
Neostigmine Methylsulfate	\$160
Papaverine HCl	\$110
Phenol	\$160
Phentolamine Mesylate	\$160
Phenylephrine Hydrochloride	\$160
Pregnenolone	\$160
Progesterone	\$110
Ropivacaine HCl	\$160
Sildenafil Citrate	\$160
Tadalafil	\$160
Testosterone	\$160
Testosterone Cypionate	\$160
Testosterone Enanthate	\$160
Testosterone Propionate	\$160
Triamcinolone Acetonide	\$160
Triamcinolone Diacetate	\$160
Tryptophan	\$160
